Accelerating the Growth of Connecticut's C-PACE Financing Program

cpace

SPARKED BY **CONNECTICUT GREEN BANK**

APRIL 2016

Good afternoon,

We're excited to [launch](#) a new initiative today especially for owner-occupied manufacturing facilities! The [Energy on the Line](#) program will offer Connecticut manufacturers an opportunity to save even more with C-PACE. Projects at these facilities that apply for C-PACE financing by September 16, 2016 may be eligible for a limited quantity of grants worth **up to \$50,000**.

This initiative can act as a selling point for C-PACE contractors, compliment the economic development efforts of towns and cities and give building owners the opportunity to save even more money with C-PACE. The Connecticut Green Bank is working together with the Connecticut Department of Economic and Community Development to help manufacturers increase their bottom line through energy cost savings with the Energy on the Line program.

We are excited about this opportunity for C-PACE to help Connecticut's manufacturers. The Energy on the Line program has the potential to accelerate the growth of green energy and make our communities healthier. Please help us spread the word. Visit www.EnergyOnTheLine.com to learn more and contact us with any questions!
