

Request for Qualifications and Proposals

Town of Ellington, Connecticut

Small Cities Application Preparation and Program Administration

The Town of Ellington, through its Office of the Selectmen, is planning to apply for federal FY 2015 funds from the Connecticut Small Cities Community Development Block Grant (CDBG) Program. The Town seeks qualifications and proposals from firms or individuals to prepare a Small Cities grant application for submission to the Connecticut Department of Housing (DOH) and to implement such a grant, if awarded. Currently, the Town foresees submitting a Small Cities Program grant application to continue its regional housing rehabilitation program, possibly expanding it to include additional communities. Other activities that may be considered are other housing activities, community facilities, public/social services, economic development and planning. The Town is also seeking services for the programming and administration of Program Income that it may receive or become available during the period of or following the completion of its prospective FY 2015 grant. The deadline for submitting the application to DOH is expected to be by April 10, 2015.

I. Background

Ellington has been an active participant in the Connecticut Small Cities Program, having received numerous Small Cities CDBG grants since the early-1990s. These grants have enabled the Town to address a range of its community development needs, including the improvement of privately-owned and public housing, public social services, community facilities and infrastructure needs.

Through its FY 2015 grant application, the Town seeks to continue to build on these past efforts. Due to the town's limited financial and staff resources and appropriate expertise, it intends to continue with the grant management/delivery approach that it has successfully used for its prior Small Cities Program grants contracting for grant application preparation and grant management/implementation via highly qualified professional consultant services. Thus, the Town is seeking consulting assistance for the preparation of (1) a grant application, and (2) grant administrative and implementation services in the event that DOH awards a grant to the Town. The prospective engagement would also include the commitment and expenditure of Program Income (subject to any needed approvals by the town and/or the DOH) that may become available to the town during the duration of the administrative/implementation phase of the grant, or following the grant's completion.

The Town's expectation for the consultant is that the consultant will assume principal responsibility for the preparation of the grant application, under the supervision of the First Selectman. The required services are identified in the following section. In the event that the Town receives a Small Cities grant(s), the consultant will similarly assume principal responsibility for nearly all aspects of managing and implementing the grant. These functions also will be carried under the direction of the First Selectman. The demands on its municipal staff and officials should be limited largely to the areas of oversight of the grant, involvement of

the finance offices and other departments/offices for the types of routine functions and interaction that would normally be expected. The Town will also provide in-kind support such as providing office space in the Town Hall and contribution to certain operating expenses, i.e., telephone and internet service, copying, posting, etc. Due to the nature of the anticipated grant, the Town expects that the consultant will maintain an on-site presence on either a full- or a regularly scheduled part-time basis.

With the town's intention to implement the grant via a management consultant through a single contract, the proposer should be prepared to provide the full staffing complement needed for this type of activity. Typically, for the type of project under consideration, this would include positions such as a Grant Director/Manager, Program Coordinator, Construction/Rehabilitation Specialist and Program Assistant (Administrative Assistant/Bookkeeper). However, proposers with individual areas of qualifications and experience may submit proposals on a project team or joint-venture basis. If such an approach is proposed, there should be a single person/entity identified as the lead consultant with whom the contract would be executed.

Ellington anticipates requesting up to the maximum allowable grant amount. The selected grant activity and budget will be determined during the grant application process.

II. Scope of Services Requested

A. CDBG Small Cities Grant Application Preparation

The following tasks are required to prepare an application:

1. Meet with Town officials and other individuals to identify potential project activities.
2. Ensure compliance with the Town's Citizen Participation Plan.
3. Conduct (as necessary), review and analyze survey and other available data for the purposes of developing recommendations for funding requests.
4. Assist local staff in various matters of local and inter-municipal coordination, including conduct of public hearings.
5. Serve as the liaison to DOH representatives during the application process.
6. Prepare the application submittals required by DOH. Depending on current DOH requirements which may change from time to time, a Letter of Intent or Interest, pre-application or similar preliminary submittal may be required before proceeding with a full application.
7. Support the Town in any necessary follow-up relating to the application(s) after submission.

B. Services Related to Grant Application

1. Complete the environmental review record (ERR) process, consistent with the procedural requirements of DOH and HUD, including publication or posting of Notice of Intent/Request of Release of Funds (NOI/RROF), and Certification.

C. Program Administration, Implementation and Activity Coordination

If the grant application is funded, services will be required for administration and implementation of the approved Small Cities Program grant. Services required include, but are not limited to:

1. Overall grant administration and financial management, activity implementation, coordination and delivery, including completion of preliminary grant requirements, complete grant management and program outreach, and adherence to federal and CT Small Cities Program requirements and policies (see Attachment A);
2. Coordination with Town officials, departments and organizations;
3. Provision of office support and grant administrative services;
4. Procurement of equipment, goods and other needed services; and
5. Any other applicable administrative or implementation services required for completion of grant activities, including but not limited to housing rehabilitation specialist services, project management, conducting planning studies and economic development technical assistance.

III. Selection Criteria

Proposals will be reviewed and evaluated by the Town based upon the following general factors:

1. Scope of services offered and the appropriateness of those services to the needs of the Town;
2. Relevant experience and qualifications of the firm and/or individuals to be involved in the project (including both extent and quality of experience); and
3. Proposed fee for grant application preparation.

As this proposal is soliciting professional services, the proposed fee will not necessarily be the determining factor in the selection of the consultant. The prospective consultant's qualifications, experience and quality of services, as determined both by the information contained in its proposal and through references, shall be the priority considerations over fee in the selection of the consultant. However, in the event that the evaluation of the qualifications and experience of competing proposers finds that they are essentially equal, the proposed fee may be the determining factor in the contract award, with the contract being awarded to the proposer with the more advantageous fee, assuming that the more advantageous fee offsets the difference in experience and qualifications. The fee proposal should be submitted separately from the main (technical) proposal and will be opened and reviewed only after the technical proposal (work scope and consultant information, experience and qualifications, etc.) has been reviewed and evaluated.

Proposals will be evaluated according to the Minimum and Comparative Evaluative Criteria listed below. The Town will first review proposals against the Minimum Evaluative Criteria, which will serve as a threshold for further consideration and review against the Comparative Evaluative Criteria -- only those proposals that meet all of the Minimum Evaluative Criteria will be given further consideration.

The envelope containing the fee proposal should be clearly marked as such. The current maximum allowable amount of Small Cities funds for a fee for preparing a grant application is \$3,000 per application. complying with the environmental review record (ERR) requirements associated with the grant application. These costs are a recognized pre-agreement cost in the event that the grant is funded.

Compensation may be proposed either on a fixed or not-to-exceed billing basis. Fee proposals should clearly identify all elements contained therein, including basis for fees charged (hourly rate vs. direct labor X multiplier); billing rates by individual position or job category; proposed levels of services, i.e. full time, part-time, etc.; estimated cost by activity/task; direct project expenses; subcontractor costs, if any (include a detailed cost breakdown); and any other costs comprising or not included in the proposed fee.

V. General and Special Provisions

All proposals become the property of the Town of Ellington.

The Town reserves the right to waive any informality in or reject any and all proposals as it deems to be in its best interests. Proposals, amendments to proposals or withdrawals of proposals after the time set for proposals acceptance will not be considered.

The selected bidder shall comply with all applicable state and federal laws in the performance of service, specifically those relating to the Connecticut Small Cities Program (See Attachment A).

The Town intends to engage the services identified in this solicitation through a contract with a single entity (individual or firm). However, contractor/subcontractor arrangements where there is essentially a pass-through of responsibilities by the contractor to the subcontractor(s) is not acceptable to the Town.
