F. Stein Road Parking Area Project – referring the project to the Planning & Zoning Commission for a report pursuant to Conn. Gen Stat. §8-24

Ms. Ferry asked what the engineering cost was for the drawings that were provided to the BOS. Ms. Spielman said Russo Engineering did the specs and the cost was $3,401.50; this came out of the Engineering budget.

Ms. Ferry said she has not heard of this project previously and asked if it came through the Recreation Department. Ms. Spielman said that this project has been in discussion with Recreation as well as the Ad Hoc Robert Telford Memorial Committee. It is in the phase of developing an overall plan, but nothing is moving forward without the proper approvals.

Ms. Ferry said that she drove there today and it is very steep; she is concerned that it will require a lot of fill. She asked if stairs will be added. Ms. Spielman referred to the drawing which shows that there will be a trail that will connect to the existing trail. Ms. Spielman said that there are other jobs currently going on in Town so there is availability of fill for the project. Also, it will be topped off with millings for finish, but none of this will happen without the approvals. Ms. Ferry asked if at this point there will be no cost to the Town and Ms. Spielman said that this is correct.

Mr. Stavens asked which option presented is preferred and how many parking spaces there would be. Mr. Stomberg asked if the neighbors had been made aware and if they are comfortable with this. Ms. Spielman said that there are trails up there that the neighbors already use and this will enhance the area. Mr. Webb said that Option 1 [ATTACHED] is preferred as it has less impact on the neighborhood. He added that there is a sanitary sewer up there and there have been discussions with the neighbors in the area; further input from the neighbors will be very important going forward. Mr. Webb said that the parallel parking will provide 5 to 6 parking spaces.
